CHEMISTRY:
In the past, 100-level chemistry consisted of two 3-day a week sections and one 5-day a week section. This caused confusion, so we've given the 5-day a week intensive courses their own numbers. The updated statement reflects this. Many freshman will receive placements listing two options (either Chem 111a / Chem 113a OR Chem 111a / Chem 115a). In a borderline cases such as these (or for any student with a question), please urge your advisees to consult with a Chemistry faculty member at the Academic tea or during an office visit to determine the appropriate placement. In short:

**Fall**
- Chem 111a sections 1 or 2: 3-day a week course. The most common placement
- Chem 113a: 5-day a week course. Designed for the under prepared
- Chem 115a: the alternative lab program, uses Chem 111a lectures. Designed for the well prepared.

**Spring**
- Chem 112b sections 1 or 2: 3-day a week course. The most common placement
- Chem 114b: 5-day a week course

CLASSICS, GREEK, LATIN
Latin and Greek do satisfy the language requirement. Because we offer three very different types of courses (Latin, Greek, and Classical Studies courses), it is perfectly reasonable for a student to take two courses with us their first semester (e.g. Latin at the appropriate level and CSTS227 (Race & Ethnicity in the Classical World) or intermediate Latin and Elementary Greek). Classics courses are listed under three rubrics in the Tri-Co Guide: Classical Studies, Greek, and Latin (do not use Classics, Classical Languages, or Classical Culture and Society).

ENGLISH:
First-year students can take most 200-level courses in English, though some require that they talk with the professor first. **In addition, two 200-level courses each semester are geared to first-year students (Introductory Emphasis courses).** This semester these two courses are:
- 228a Virtue, Vice and Profit T/Th 11.30-1 B. Parris (Renaissance)
- 269a Love and Sex T/Th 8.30-10 G. Stadler (American)

SPANISH:
Please note all Spanish Elementary sections are open to "true" beginners and all students who placed at that level.
